

CECW-EH

**DEPARTMENT OF THE ARMY
U.S. Army Corps of Engineers
Washington, DC 20314-1000**

EM 1110-2-1612

Manual
No. 1110-2-1612

30 October 2002

**Engineering and Design
ICE ENGINEERING**

Table of Contents

Subject	Paragraph	Page
Chapter 1 Introduction		
Purpose	1-1	1-1
Applicability	1-2	1-2
Explanation of terms	1-3	1-2
Ice impacts on Corps activities	1-4	1-2
References.....	1-5	1-8

PART I: ICE PROPERTIES, PROCESSES, AND PROBLEM SOLUTIONS

**Chapter 2
Review of Ice Processes and Properties**

Introduction.....	2-1	2-1
Physical properties of ice and fresh water	2-2	2-1
Mechanical properties of freshwater ice	2-3	2-3
Frazil ice	2-4	2-7
Thermal ice growth.....	2-5	2-10
Dynamic ice cover formation	2-6	2-13
Ice cover breakup.....	2-7	2-14
References.....	2-8	2-16

**Chapter 3
Ice Control for Flood Damage Reduction and Hydropower Operation**

Introduction.....	3-1	3-1
-------------------	-----	-----

Section I. Nonstructural Ice Control

Mechanical measures to reduce the risk of ice jam formation.....	3-2	3-1
Thermal Measures to Reduce the Risk of Ice Jam Formation	3-3	3-17
Chemical Measures to Reduce the Risk of Ice Jam Formation	3-4	3-28
Breaking Ice Jams.....	3-5	3-35
Cost and Performance of Nonstructural Measures	3-6	3-32
Case Study	3-7	3-36
Discussion.....	3-8	3-37

Section II. Structural Ice Control

Introduction	3-9	3-38
Sheet Ice Retention Structures	3-10	3-39
Breakup Ice Control Structures	3-11	3-51

Subject	Paragraph	Page
Ice Diversion Structures.....	3-12	3-57
Analysis	3-13	3-60
References.....	3-14	3-64

Chapter 4
Hydraulic Computations and Modeling of Ice-Covered Rivers

Introduction.....	4-1	4-1
<i>Section I. Modeling River Ice Covers</i>		
General.....	4-2	4-2
Modeling ice covers with known geometry	4-3	4-2
Modeling wide-river ice jams	4-4	4-3
Roughness of the ice accumulation	4-5	4-6
Limitations of ice modeling.....	4-6	4-6
<i>Section II. The ICETHK Model</i>		
General.....	4-7	4-8
Ice covers with known geometry	4-8	4-8
Equilibrium ice jam theory and ICETHK	4-9	4-8
Ice in overbank areas	4-10	4-9
Structure and operation of ICETHK.....	4-11	4-9
<i>Section III. The HEC-RAS Model</i>		
General.....	4-12	4-10
Ice covers with known geometry	4-13	4-11
Ice jam thickness calculation	4-14	4-12
Solution procedure.....	4-15	4-12
References.....	4-16	4-14

Chapter 5
Ice-Affected Stage-Frequency Analysis

Introduction.....	5-1	5-1
Ice effects on river stage and flooding.....	5-2	5-1
Data sources.....	5-3	5-2
Form of frequency analysis.....	5-4	5-3
Approaches for developing ranked data tabulations	5-5	5-5
Summary.....	5-6	5-12
References.....	5-7	5-12

Chapter 6
Ice Force on Structures

Introduction.....	6-1	6-1
Mechanical Properties of Ice	6-2	6-2
Environmental Forces	6-3	6-5
Forces Limited by Ice Failure	6-4	6-7
Forces Limited by the Momentum of an Ice Feature	6-5	6-18
Canadian and American Codes	6-6	6-20
Vertical Ice Forces	6-7	6-21

Subject	Paragraph	Page
Summary	6-8	6-22
References	6-9	6-22

Chapter 7
Sediment Transport

Introduction.....	7-1	7-1
Sediment transport under ice	7-2	7-1
Effects of winter navigation.....	7-3	7-2
References.....	7-4	7-10

Chapter 8
Bearing Capacity of Floating Ice Sheets

Introduction.....	8-1	8-1
Bearing capacity of ice blocks	8-2	8-1
Bearing Capacity of Floating Ice Sheets	8-3	8-3
Analytical Methods for Short-Term Loads	8-4	8-4
Empirical Methods for Short-Term Loads	8-5	8-7
Moving Loads	8-6	8-10
Long-Term Loads	8-7	8-10
References.....	8-8	8-11

Chapter 9
Model Tests in Ice

General.....	9-1	9-1
General Similitude Considerations	9-2	9-1
Undistorted Models	9-3	9-3
Distorted Models	9-4	9-5
Model Ice Materials	9-5	9-6
Model Calibration	9-6	9-8
Considerations in Choosing Modeling.....	9-7	9-9
References.....	9-8	9-9

PART II: ICE JAMS AND MITIGATION MEASURES

Chapter 10
Ice Jam Flooding in the United States

General.....	10-1	10-1
Ice jam flooding.....	10-2	10-2
Ice jam flood losses.....	10-3	10-4
Ice Jam Database	10-4	10-7
References.....	10-5	10-9

Subject	Paragraph	Page
Chapter 11		
An Ice Jam Primer		
Review of ice types.....	11-1	11-1
Types of ice jams.....	11-2	11-2
Causes of ice jams.....	11-3	11-4
Predicting ice jams.....	11-4	11-5
References.....	11-5	11-7
Chapter 12		
Ice Jam Mitigation Techniques		
Ice jam flood control.....	12-1	12-1
Types of mitigation measures	12-2	12-1
Selecting mitigation measures	12-3	12-2
Permanent measures	12-4	12-3
Advance measures	12-5	12-10
Emergency management for ice jam flooding	12-6	12-15
Emergency measures	12-7	12-16
Case studies	12-8	12-21
Conclusion	12-9	12-23
References.....	12-10	12-23
PART III: WINTER NAVIGATION ON INLAND WATERWAYS		
Chapter 13		
River Ice Management Study		
<i>Section I. Study Concept</i>		
General.....	13-1	13-1
Objectives	13-2	13-1
Elements	13-3	13-1
<i>Section II. Study Elements</i>		
River system definition.....	13-4	13-1
Ice problem identification.....	13-5	13-2
Ice forecasting.....	13-6	13-2
Structural solutions	13-7	13-3
Operational solutions	13-8	13-3
Recommended plan.....	13-9	13-4
Chapter 14		
River Ice Problem Identification		
Surveys needed	14-1	14-1
Hydrology and hydraulic studies	14-2	14-1
Identification of ice problems	14-3	14-2
Ice problems around navigation projects	14-4	14-3
Ice problems occurring between navigation projects.....	14-5	14-7
References.....	14-6	14-12

Subject	Paragraph	Page
Chapter 15		
Ice Forecasting		
General.....	15-1	15-1
<i>Section I. Long-term water temperature forecasts</i>		
Objective.....	15-2	15-1
Model description	15-3	15-2
Model operation.....	15-4	15-5
Model results	15-5	15-6
Model accuracy.....	15-6	15-7
<i>Section II. Mid-winter ice forecasts</i>		
Objectives	15-7	15-8
Forecast model description	15-8	15-9
Hydraulic model description.....	15-9	15-10
Thermal model description	15-10	15-11
Ice model description.....	15-11	15-13
System parameters	15-12	15-16
Physical parameters	15-13	15-16
Initial conditions	15-14	15-18
Boundary conditions.....	15-15	15-18
Model output.....	15-16	15-19
Model calibration.....	15-17	15-19
Model operation.....	15-18	15-20
Location of field measurement sites	15-19	15-22
Initial conditions generator	15-20	15-22
Boundary conditions generator.....	15-21	15-23
Modes of operation	15-22	15-24
Model results	15-23	15-24
References.....	15-24	15-27
Chapter 16		
Ice-related Hydrometeorological Data Collection and Monitoring		
Introduction.....	16-1	16-1
Existing Instrumentation and Observation Methods	16-2	16-2
Stage Measurements	16-3	16-3
Discharge	16-4	16-8
Air and Water Temperature	16-5	16-10
Ice Thickness	16-6	16-13
Ice Movement and Velocity	16-7	16-17
Ice Extent and Concentration	16-8	16-18
Systems for Transmitting River Ice Data	16-9	16-22
References	16-10	16-23

Subject	Paragraph	Page
Chapter 17		
Navigation in Ice		
Introduction	17-1	17-1
Environment	17-2	17-1
Vessel shape	17-3	17-2
Auxiliary icebreaking devices	17-4	17-2
Summary	17-5	17-7
References.....	17-6	17-8
Chapter 18		
Ice Control for Navigation		
Introduction	18-1	18-1
<i>Section I. Ice Control in Navigation Channels</i>		
Nonstructural Ice Control in Navigation Channels	18-2	18-1
Structural Ice Control in Navigation Channels	18-3	18-5
<i>Section II. Floating Ice Dispersion</i>		
Introduction.....	18-4	18-8
High-Flow Air Systems	18-5	18-9
Air System Components	18-6	18-9
Effectiveness of the Air Systems	18-7	18-12
Design of a High-Flow Air System	18-8	18-10
Example	18-9	18-14
Flow Inducers	18-10	18-12
<i>Section III. Ice Passage Through Navigation Projects</i>		
Introduction	18-11	18-18
Submergible Tainter Gates	18-12	18-18
Roller Gates	18-13	18-18
Conventional Tainter Gates	18-14	18-19
Gate Limitations in Winter	18-15	18-19
Other Ice Passage Schemes	18-16	18-20
<i>Section IV. Anti-Icing and Deicing at Navigation Projects</i>		
Introduction	18-17	18-20
Providing Electricity for Heating to Locks and Dams	18-19	18-23
Mechanical Removal of Ice from Lock Walls	18-20	18-24
Surface Treatments to Reduce Ice Adhesion	18-21	18-25
References.....	18-22	18-27
Chapter 19		
Operational Solutions		
<i>Section I. Vessel Scheduling or Convoying</i>		
Introduction.....	19-1	19-1
Operational choices.....	19-2	19-1
Transit scheduling or convoying.....	19-3	19-1

Subject	Paragraph	Page
<i>Section II. Operational Techniques at Locks and Dams</i>		
Introduction.....	19-4	19-2
Physical ice removal	19-5	19-3
Methods used at locks.....	19-6	19-4
Methods used at dams.....	19-7	19-5
<i>Section III. Operational Use of Thermal Resources at Locks and Dams</i>		
Introduction.....	19-8	19-5
Man-made energy sources	19-9	19-5
Unconventional energy sources	19-10	19-6
References.....	19-11	19-8

Appendix A
Glossary

Appendix B
Ice Jam Mitigation Case Studies

Appendix C
Typical River Ice Management Study
